Space Division

ICP Search is a global Executive Search, and specialist recruitment company, with a division dedicated to the Space industry. We have successfully completed projects across Europe, Asia, North America, South America, Australia and Africa.

Our team of consultants are continually sourcing the very best mid to senior level professionals, and have a successful heritage placing these individuals into our clients, which include Satellite Prime Contractors, Sub-System- and Component Manufacturers, Research and Governmental institutions.

Our method is to always work in a pro-active manner to find only the most relevant candidates that reflect our client's requirements. The benefit to our clients is that we will specifically target and head-hunt the best candidates who are in the market, and not simply those who may be open or actively looking for new opportunities.

Established in 2001, our consultants and industry research teams have a wealth of experience in placing individuals into Commercial, Technical,

Engineering, Operational, Management and Director level positions.

This experience enables us to fully understand the market, current industry trends, and competitor landscape, allowing us to find our clients the very best individuals for your specific needs, in the shortest possible timeframe.

In addition to our international contact base and exceptional personal networks, ICP Search has offices in the UK (London and Brighton) and Germany (Munich) staffed with multi-lingual consultants and research specialists as well as partners in Switzerland and Hong Kong. Language skills include German, French, Spanish, Portuguese, Polish, Swedish and Russian to name a few, making it possible for us to discretely and efficiently find and locate our clients the right people.

With respect to the roles that we have successfully filled for our clients over the last 12 months, a sample is below:

- System Engineers
- RF Engineers
- Payload Engineers
- Account Managers
- Optical Engineers
- Electronic Engineers
- Ground Segment Engineers
- Product Assurance Managers
- Project/Programme Managers
- Product Development
- Contract Officers
- Mechanical Engineers
- Propulsion Engineers
- AOCs Engineers
- AIT Engineers
- Project/Programme Managers
- Software Engineers
- Spacecraft Operations Engineers

For further information, please contact our one of our specialist Space consultants by phone +44 1273 872260, or email info@icpsearch.com.
